

Hydrotech Nutri-Pack

For Industrial Wastewater Nutrient Reduction

Reduce nutrients in your industrial wastewater stream using this plug and play solution from Veolia Water Technologies

Designed for customers looking to reduce their environmental footprint

Microscreen filters (disc and drum filters) are a proven solution for wastewater effluent suspended solids and phosphorus reduction. This new package plant solution offers a plug and play option which is well suited to industrial producers looking to reduce their environmental footprint.

Hydrotech Package Plant for Nutrient Removal Offers Extended Value

Fast delivery time (as fast as 16 weeks from PO to functioning plant)

No civil works required: customized hydraulic profile to match site needs

Optimized process control for chemical dosing with varying feed waters

Technical features and performance

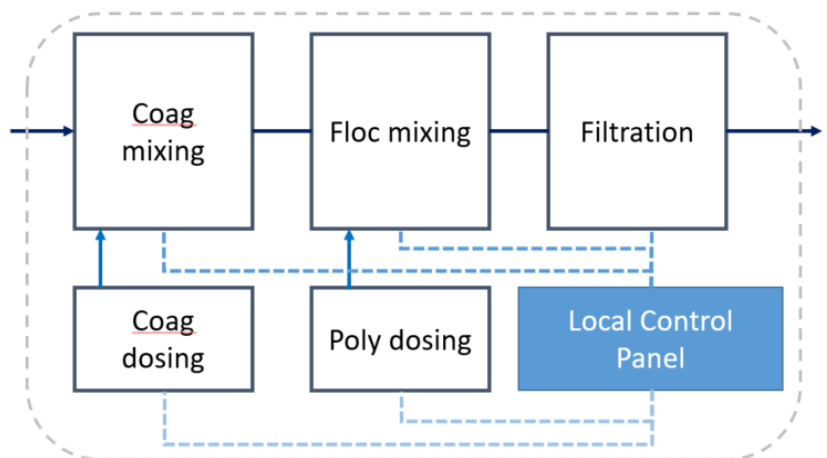

Solutions available in three sizes:
 < 25 m³/h, < 60 m³/h, < 120 m³/h

Total P reduction ≤ 90 %

TSS reduction ≤ 95 %

TSS feed limit: 1000 ppm

Minimum footprint: ca. 15 m²
